Guide to installing the PuTTY SSH client

NOTICE:

PuTTY is not a supported product by DSG. This software is a freeware product from the developers and as such is treated as a user installed software product. DSG has developed a user installation guide that can be used to assist in the installation process.

Once again this is a product that you use at your own risk. DSG only supplies the software for distribution and does not support or install the product locally on any desktop computer systems.

DSG Administrator

1. Execute \\ppdserver\Support\Desktop-

    Utilities\SHAREWARE\WinNT4.x(Apps)\PuTTY\setup.exe

2. Answer Yes to continue.

3. Read the Welcome screen and select Next when ready.

4. Select a destination folder and click Next when done. (Usually the default is fine.)

5. Select the Start Menu folder in which you would like the shortcut created. Usually the

    default is fine. Click Next when ready.

6. Read the screen and determine which icons you want. Click Next when ready.

7. Click Install.

8. Click Finish.
